

VICTOR DORANTES

SOFTWARE ENGINEER | UNITY & XR DEVELOPER | TECHNICAL PROJECT LEAD

Parramatta, NSW • victordorantes.itiad@gmail.com • <https://levortic.github.io/AboutVictor/>

PROFESSIONAL PROFILE

Software engineer and technical lead with 7+ years of experience delivering Unity, XR, mobile, web and e-learning solutions. Combines hands-on C# development with Agile delivery, pipeline improvement, performance optimization and cross-functional leadership. Experienced in turning complex training and promotional concepts into reliable user experiences, mentoring developers and supporting projects from planning through deployment.

CORE CAPABILITIES

Development: Unity 3D • C# • Godot • Unreal Engine 4 • HTML5 • CSS • JavaScript • Python

XR & Engineering: VR/AR • Oculus Quest • HTC Vive • Mobile optimization • Git • Performance profiling • Asset pipelines • Telemetry

Delivery & Leadership: Agile • Product ownership • Project planning • QA/debugging • Documentation • Mentoring • Stakeholder communication

Languages: Spanish — Native • English — C1 certified

PROFESSIONAL EXPERIENCE

Project Assistant | FILNA — *Mexico City, Mexico* | 2023–2025

- Planned, designed and scheduled delivery phases for web projects, helping the project manager maintain progress through completion.
- Coordinated communication across team members to clarify priorities, surface issues and support on-time, quality-focused delivery.
- Tracked project requirements and deadlines while balancing quality and workplace safety expectations.

Lead Unity Developer | Global Hitss (Grupo Carso account) — *Remote, Mexico* | 2021–2023

- Led Unity development for mobile AR experiences, interactive mini-games and prototypes supporting Grupo Carso brands and promotional activations.
- Streamlined development workflows and managed Git repositories and shared asset libraries, improving team coordination and delivery efficiency.
- Profiled and resolved code bottlenecks; optimised assets and loading workflows to improve performance on mobile devices.
- Partnered with art, production, programming and R&D teams to deliver polished demos for brands including Telcel, Telmex and Sanborns.

Lead Software Developer / Unity Developer | Yeltic — *Mexico City, Mexico* | 2018 – 2020

- Progressed from Unity Developer to technical lead, standardising the VR development pipeline and mentoring newly hired developers.
- Built the complete C# implementation of an HTC Vive VR experience and optimised training applications for Oculus Quest deployment.
- Developed telemetry tools for VR training, enabling teams to capture learner interactions and evaluate experience outcomes.
- Acted as product owner within an Agile workflow, managing priorities and timelines for VR training, e-learning and therapy applications.
- Stabilised legacy projects through testing, debugging, documentation and version control; applied game-design principles to improve e-learning engagement.

IT Support | Universidad Digital del Estado de México — *Mexico* | 2017–2018

- Provided frontline IT support and maintained PCs, printers and network equipment for an education provider delivering secondary, undergraduate and postgraduate programs.
- Guided new students and tutored mathematics and science subjects in an on-site learning environment.

SELECTED COMMUNITY PROJECT

Internet to the Mountain | Volunteer Network Project

- Planned, deployed and managed a 3 km multi-router network connecting an isolated community to fibre internet in the nearest town; maintained the service for approximately three years until local fibre infrastructure became available during the COVID-19 period.

EDUCATION

Master of Software Engineering (Artificial Intelligence) | *Torrens University Australia*

Bachelor of Engineering in Interactive Technologies for Digital Animation | *Universidad del Valle de México (UVM)*
